pricing details**

COMMENTS: Make way for this heavyweight champion. The new Hino 358 has been optimized for all of your heavy service needs. A 13,200 lb. front axle, 23,000 lb. rear axle, combined with a standard 120,000 psi heavy duty frame and standard driver-controlled locking rear differential makes the Hino 358 ideal for delivering heavy loads where maximum frame strength and traction are required. The standard full air, dual-circuit, 4-wheel drum braking system provides reliable and effective braking for when you need it the most. The 358 is powered by Hino's 260 horsepower, 7.7L 6-cylinder, turbocharged, diesel engine with 660 lb.-ft. of torque and is available with a heavy-duty Allison 3000RDS 6-speed automatic transmission with PTO capability. The 358 is offered with spring or Hendrickson rear air suspensions. Recommended applications for the Hino 358 include: delivering materials, tanker, dump, and refrigeration units. Hino offers a "clean chassis" as standard for the 358 model. With nothing mounted to the outside of the frame rails behind the cab, the clean chassis configuration is ideal for beverage body applications and for moving vans. For 60 years we at Somerville National Leasing have been striving to give our customers the best quality service possible. In 2008 Somerville Hino first opened its doors, we have been an award winning Hino dealership in Canada ever since. Whether you're looking for a new or used...
